RECENT PROJECTS

Mixr [React/Redux, Rails]

[Live](#) | [Github](#)

Single-page Webapp inspired by Tumblr.

- Leveraged ActiveRecord associations between users to personalize content feed based on “follows”
- Implemented modal dialog windows through React-Modal library to provide a seamless user experience
- Improved scalability and server response time by storing user content on cloud through AWS

Fireworks [JavaScript]

[Live](#) | [Github](#)

Quirky, animated soundboard built purely on JavaScript

- Integrated HTML5 canvas to produce dynamic animations
- Incorporated the Howler.js library to provide each animation a distinct sound

Don't Get Lost [React Native, Rails]

[Live](#) | [Github](#)

Mobile App designed to keep track of your friends' locations

- Utilized Asynchronous Storage to create persistent user login, eliminating the need for users to re-login
- Incorporated geolocation by integrating Airbnb's AirMapView and React Native's built-in geolocation API
- Practiced responsive web design by creating components that adjust to the device's screen size
